

Area of Emphasis – Contact Lenses

- ❖ Use of contact lenses for correction of ametropia (advantages/disadvantages, patient selection criteria) **(10%)**
- ❖ Fitting and prescribing soft spherical contact lenses **(10%)**
- ❖ Fitting and prescribing astigmatic contact lenses **(10%)**
- ❖ Fitting and prescribing multifocal contact lenses **(10%)**
- ❖ Fitting and prescribing rigid, gas permeable contact lenses **(10%)**
- ❖ Assessment, differential diagnosis and treatment of CL-related complications **(10%)**
- ❖ Fitting and prescribing corneal reshaping lenses (ortho-K lenses/CRT) **(6%)**
- ❖ Fitting and prescribing scleral lenses **(8%)**
- ❖ Fitting and prescribing lenses for keratoconus or other irregular corneas **(8%)**
- ❖ Indications for and interpretation of corneal topography **(10%)**
- ❖ Indications for and interpretation of wavefront assessment **(8%)**
