

Statement on Maintenance of Certification Value

May 2023

Thank you for your support of the American Board of Optometry (ABO) and Board Certification!

NCCA-accredited Board Certification by the American Board of Optometry is a mark of distinction for both you and your practice. It assures patients and health care organizations you are committed to the highest quality standards for education, knowledge, and skills to provide superior eye care.

Maintenance of Certification is a means toward life-long learning. The nominal annual fee to maintain this prestigious credential includes:

- Three self-study CAP Assessments per year, COPE-accredited for 2.5 hours each.
- Four live webinars per year, COPE-accredited for 2 hours each.
- Library of twelve previously offered COPE-accredited webinars for 2 hours each.
- Sixteen self-guided learning modules worth 1-3 points toward MOC requirements.
- A growing list of webinars for professional development (not for credit.)

The ABO appreciates your recognition in achieving and maintaining Diplomate status through the ABO.

Sincerely,

David Sterna, O.D., F.A.A.O.

Chair – American Board of Optometry
